

# Tucson

# Dedicated to everyone who's dedicated.

Life is a journey. Sometimes the road less travelled. Sometimes the morning commute. Getting there is half the fun – and most of the work sometimes. Because let's face it: when it comes right down to it, there's a secret to success: hard work works. Like the Tucson: through hard work and innovation, Hyundai successfully created one of world's best-selling SUVs – designed and built in Europe. And now we have worked hard to make it even better. Combining a refreshed, bolder design with loads of new smart tech and the latest advanced driver assistance systems, the New Tucson continues to define a higher standard as standard.

## A bold new look.

Sleek and powerful, the New Tucson's bolder, refreshed exterior design strikes a stylish balance between form and function. The flowing surfaces also make a distinctive and elegant statement.

# Experience a new level of comfort.

Get inside the New Tucson and you'll feel it instantly: our attention to detail and passion for quality. Featuring fresh new accents, the reworked cabin now feels even more comfortable and spacious. The completely new dashboard now features a high-quality soft touch finish and double stitching line for a tailored and refined look. This sophisticated impression is complemented by the new embossed leather and textile trim materials. And for more driving comfort, the New Tucson is equipped with comfortable seats to give you the best seating position on and off the road.

# Crafted for convenience.

The New Tucson offers an expanded range of clever features that provide more comfort and convenience for everyone on board. Enjoy finger-tip control with the electronic parking brake – which also frees up space in the centre console for the wireless smartphone charging pad.

And for easier and safer parking, the Surround View Monitor gives you 360° visibility. The navigation system features 3D maps and a free five-year subscription to LIVE services offering real-time weather information, traffic updates and speed cameras – where legally allowed – so you can stay on course and up-to-date.

# Connected for a better experience.

The New Tucson has been reengineered to provide you with even more of the seamless connectivity you expect. It is equipped with the latest innovative tech that adds to your driving experience without interfering with it. Like the new 7" Display Audio touch-screen that puts everything at your fingertips with Apple CarPlay™ and Android Auto™. Just connect your smart phone to have your favourite apps right up on the big screen. You can then use voice control commands to take calls, send and receive messages, and listen to music on the premium sound system from KRELL. 10 high-end speakers and an external amplifier treat everyone on board to a very special surround sound experience.

Apple CarPlay™ is a registered trademark of Apple Inc. Android Auto™ is a registered trademark of Google Inc.

Premium sound system from KRELL

7" Display Audio touch-screen with Apple Carplay™ and Android Auto™

Wireless smartphone charging, AUX-in, USB and 12V plug right at your fingertips.

# Expressive style meets efficient performance.

Expressive from every angle, the New Tucson's side character line adds a strong sense of dynamic forward motion – flowing powerfully from the front lights to the rear. There, the redesigned rear LED combination lamps give the New Tucson a distinctive light signature for more dynamics and better visibility. Large wheels and pronounced wheel arches underline its athleticism. The integrated roof rails and tough side mouldings highlight its sturdy SUV character. And now for the first time in a Hyundai, the New Tucson features a mild hybrid powertrain system. Available in combination with the 2.0 litre diesel engine, the 48V electric system assists in acceleration, supplying up to 12kW of additional power to reduce fuel consumption and CO<sub>2</sub> emissions by up to 7%.

# A distinctive presence on any street.

The New Tucson features a newly refined light signature with full LED headlights for an even sportier edge. They flow into the top corners of the new Cascading Grille – the centrepiece of the reengineered front end. The redesigned front bumper and skid plate also feature new sculpting. All this adds to the dynamic look that makes the New Tucson stand out no matter where you are. All you have to do is get used to the attention.

# Bolder, smarter and more beautiful.

With its fresh new look, the latest driver assistance systems and upgraded powertrains – the New Tucson has been re-engineered to meet today's demands. It combines roomy SUV versatility with head-turning good looks that have been made even more distinctive through the redesign.

Dedicated to those who are dedicated, the New Tucson is designed to make you look good everywhere and anywhere – no matter if you're headed to work or just going to work out. But don't take our word for it – stop by your local Hyundai dealership for a test drive and experience the difference yourself. Or visit our website and explore the possibilities online.

# Space to explore.

Sit back and relax, the New Tucson's comfortable cabin is also extremely spacious – offering plenty of space for five adults. And the wide-opening panoramic sunroof makes it feel even roomier. You'll be happy to know that when you're out seeing more of the world, the New Tucson offers an ample amount of trunk volume of 513 litres – so you can take everything you need with you. The variable load space is also simple to adjust – the 60/40 rear seats can be folded flat in seconds to accommodate passengers and longer items. And with the rear reclining seats folded flat, you have 1,503 litres of space to fill with anything and everything you need.

The 60:40 split rear seats fold flat in seconds for maximum flexibility.

# Interior design highlights.

An impressive blend of exceptional roominess and comfort, it is also the attention to detail that makes the New Tucson interior so special.

**8" Floating touch-screen** – One of the big changes inside the cockpit of the New Tucson is the seamless 8" touch-screen. Perfectly positioned for easy interaction, it floats above the dashboard. This design allows multimedia information to be displayed higher and nearer your line-of-sight. Enjoy quick access to the infotainment and navigation system, Apple CarPlay™ and Android Auto™ as well as a free seven-year subscription to LIVE Services.

Apple CarPlay™ is a registered trademark of Apple Inc. Android Auto™ is a registered trademark of Google Inc.

**Tailored leather stitching** – Depending on the trim level, supple leather with accent stitching covers many of the interior surfaces for a refined and tailored atmosphere.

**Crafted interior details** - High quality materials and new soft-touch surfaces throughout the cockpit.

# Distinctive design details.

Featuring a wide range of bold new design elements, the New Tucson's facelift will have heads turning.

New Bi-LED headlamps with Smart High Beam assist

New rear LED combination lamps  
New twin chrome tailpipe tips

# Wheels and Transmissions

19" alloy wheel

18" alloy wheel (new)

16" alloy wheel

17" alloy wheel

6-speed manual transmission  
7-speed dual-clutch transmission (DCT),  
8-speed automatic transmission (AT)

# Clever and convenient.

Redesigned with even more of today's smart tech, the New Tucson is equipped with an abundance of clever features to make every journey even more relaxed.

**Supervision cluster** – Optimally placed and easy to read, the supervision cluster with its 4.2" colour LCD screen shows important driver information like: the status of active safety features, remaining range, fuel consumption, navigation instructions, outside temperature and more.

**Surround View Monitor** – Nice and easy. The Surround View Monitor in the New Tucson helps make manoeuvring in confined spaces easier and safer. Through a series of strategically located cameras, this advanced safety feature provides you a 360° view of the area surrounding the vehicle so you can see exactly what you're doing.

**Rear USB port** – Plug and play. There is a convenient USB charging point installed in the back for your rear seat passengers.

**Smart power tailgate system**– Enjoy easy loading convenience. The system automatically opens the tailgate when the smart key remains within the detection zone for 3 seconds or more. You don't even have to take your key out.

# Hyundai SmartSense

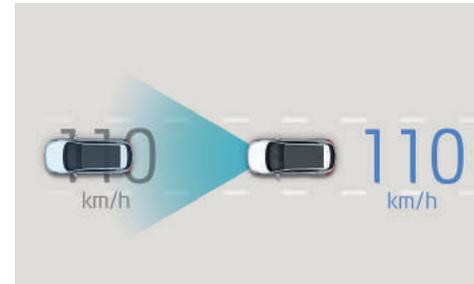

With Hyundai SmartSense, our cutting-edge Advanced Driver Assistance Systems, the New Tucson has been updated with the latest active safety technology and driving assistance features – built to provide you with more security and peace of mind. From automatically braking to avoid collisions and keeping you in your lane, to detecting vehicles in the blind spot, it can alert you of potential dangers around you when driving.

**Forward Collision-Avoidance Assist (FCA) with pedestrian detection.** The FCA system uses the front mounted camera and the radar sensor to monitor the traffic ahead. Should it detect a potential collision with a vehicle in front or with a pedestrian, it will warn the driver and if required, automatically slow or stop the vehicle.

**Lane Keeping Assist (LKA).** The standard LKA uses the front camera to monitor the lines of the road. In case of an unintended lane departure, it will warn the driver and can apply counter steering torque to guide the car back to the lane.

**Advanced Smart Cruise Control (ASCC) with Stop & Go function.** Using front radar sensors, Advanced Smart Cruise Control with Stop & Go function keeps a constant speed and distance from the vehicle ahead by automatically accelerating and braking. If traffic comes to a halt, the Stop & Go system applies the brake until the car comes to a standstill and accelerates to the desired speed as soon as the road is clear.

**Blind Spot Collision Warning (BSCW) with Lane Change Assist (LCA).** Using 2 radar sensors in the lower rear bumper, the system visually warns you of traffic in the blind spot area. Should you set the turn indicator in such a situation, the Lane Change Assist will sound an acoustic alert.

**Full LED Lighting Technology.** High Beam Assist detects oncoming vehicles as well as vehicles in the same lane ahead at night, and changes from high beam to low beam as appropriate. The Static Bending Light illuminates the front side area ahead when cornering, improving visibility at night.

**Rear-Cross Traffic Collision Warning (RCCW).** When reversing out of a narrow parking space, the Rear-Cross Traffic Collision Warning reduces the risk of a collision. Using 2 radar sensors at the rear, it warns you in case of any approaching cross traffic.

**Intelligent Speed Limit Warning (ISLW).** The Intelligent Speed Limit Warning uses the front camera and information from the navigation system to identify road speed signs and displays the speed limit and no-passing signs in real time. The information is displayed in both the navigation system display and the TFT cluster.

**Driver Attention Warning (DAW).** This standard feature raises safety and convenience to an entirely new level by continuously monitoring and analysing driving patterns. When a pattern of fatigue or distraction is identified, DAW gets the driver's attention with an audible alert and pop-up message suggesting a break.
