

IONIQ 5 N.

Never just drive.

Introducing IONIQ 5 N, our first all-electric N Model. Setting new benchmarks for high-performance electric vehicles and pure unfiltered driving fun.

With its new technologies and elevated racetrack capability, IONIQ 5 N represents a new segment of driver-focused, high-performance electric vehicles. Leveraging motorsport-bred technologies and years of Rolling Lab development, it is elevating the three pillars of N performance to an electrifying new level.

Feel the performance.

Utilising the latest technologies, IONIQ 5 N was developed to take driving fun to a new level. In doing so, we've listened carefully to our N fans in order to fine-tune our first all-electric N with the goal of electrifying the driving passion of our most demanding N-enthusiasts.

IONIQ 5 N delivers an engaging shift feeling and sensory driving feedback that performance enthusiasts often miss in an electric vehicle. Our N e-Shift technology gives you a sense of control over power delivery and that jolt feeling between shifts for greater driver feedback and control.

IONIQ 5 N lets you truly feel and hear your drive – and change the sound of it. N Active Sound+ is paired with N e-Shift to enhance your driving experience – a 10-speaker system offers three sound themes, which react dynamically to how you're driving based on speed and throttle position. N Drift Optimiser technology helps maintain the drift angle by balancing multiple vehicle systems responding to real-time inputs.

Performance-enhancing features.

Created for and by people who truly love cars, the IONIQ N's sleek and sporty interior embraces and excites. The performance cockpit features a newly designed N steering wheel, N Bucket Seats and a centre console that is optimised for track driving with knee pads and shin support as well as a sliding armrest.

At the front.

In the front, the bumper features an N Mask graphic fascia with functional mesh, supported by an air curtain and active air flaps for extra cooling. A lip spoiler runs across the lower part of the bumper to emphasise the car's low-slung stance and convey its performance intent.

At the rear.

At the rear, the prominent, wing-type N spoiler supports optimal aerodynamic performance – assisted by the rear diffuser and air outlet with their eye-catching Luminous Orange accents – further highlighting IONIQ 5 N's high-performance capability and enhancing its aggressive styling.

Forged 21" aluminium wheels.

The forged 21" aluminium wheels look fantastic while improving handling and traction by a reduction in unsprung weight. They are wrapped in high-grip 275/35R21 Pirelli P-Zero tyres for improved ride and handling and better grip in track performance.

Driving Engagement. Dedicated N Modes.

N e-Shift:

Simulates gearshifts by controlling the motor torque output, allowing precise and interactive driving control.

N Grin Boost

Boosts the power output from 609PS to maximum 650ps for 10 seconds.

N Drift Optimiser

Helps to maintain the drift angle by balancing multiple vehicle controls (stability and traction control) responding to real-time inputs.

N Launch Control

Assists to extract the maximum acceleration (0-62 mph in 3.40 seconds) with different road grip levels (Low, Medium, High).

N Torque Distribution

Torque distribution to the front and rear axles can be adjusted to 11 levels.

N Battery Preconditioning

Allows full performance to be extracted by setting the target battery temperature. Two modes are available: Drag for maximum power and acceleration, and Track for steady temperature level.

N Race

Allows power output and battery temperature to be managed for the desired driving style. Sprint mode provides maximum power, whilst Endurance can be selected to manage power for extended track use.

Get inside the performance cockpit.

Created for and by people who truly love cars, the IONIQ N's sleek and sporty interior embraces and excites. The performance cockpit features a newly designed N steering wheel, N Bucket Seats and a centre console that is optimised for track driving with knee pads and shin support as well as a sliding armrest.

The centrepiece of the sleek modular dashboard is the extra wide integrated display, featuring a 12.3" touch infotainment screen and a 12.3" digital cluster for a high-tech look. The screens also display a wide range of electric vehicle and performance driving data..

The two-tone N Bucket Seats are positioned about 20 mm lower compared to the basic specification, designed for customers who pursue high-performance drivability. They feature N emblems and welcome lighting.

Express yourself.

Choose from a wide range of exterior colours to complement the eye-catching silhouette.
